

Personality + Career

Students in SCC's Associate of Health Sciences program are curious, critical thinkers and have a desire to work in a healthcare career. They are caring and compassionate team players who have an interest in investing in the health and wellness of others.

Program	What do students learn in the program?	What you'll earn!	Career Opportunities	Certificate Preparation	Required Tools, Supplies, and Uniforms
Associate of Health Sciences	This program provides students with a focused transfer pathway into a health sciences program at a four-year institution or SCC. Students work closely with an advisor to select coursework that meets the requirements for health academic programs and health sciences careers. Students in this program learn about career options in the health care field while taking general education courses before enrolling in an SCC Health Sciences program.	No salary information is reported as students transfer to a four-year college or university, or pursue study in one of SCC's Health Sciences programs.	Students in SCC's Associate of Health Sciences program have the opportunity to apply to one of SCC's 16 Health Sciences programs or transfer to almost any institution. Students should contact a transfer advisor at their destination school to determine transfer requirements. Transfer admissions representatives from the following colleges and universities regularly visit SCC: <ul style="list-style-type: none"> • Bellevue University • Bryan College of Health Sciences • Concordia University • Doane University • Nebraska Wesleyan University • Peru State College • University of Nebraska-Lincoln • University of Nebraska Omaha • Wayne State College 	Completion of the Associate of Health Sciences program does not lead to a certificate, credential, or licensure, but often completes pre-requisite coursework for advanced degrees at other institutions. Completion of some elective coursework including, but not limited to, nursing assistant, EMT, phlebotomy, etc. may lead to a student being eligible to complete certification or licensing requirements for the specific job. See course instructor for more information.	Some elective courses including, but not limited to, nursing assistant, EMT, etc. will require a uniform and other supplies available in the SCC Campus Store.

Associate of Health Sciences

*Skills presented in the images used in this brochure are performed by students in SCC Health Sciences programs and/or advanced transfer degree pathways. This degree does not lead to a certificate, credential, or licensure.

With the ever-increasing need for healthcare professionals, the Associate of Health Sciences program is designed to serve two types of students.

The **General Studies** option is for students who plan to earn their degree in one of Southeast Community College's Health Sciences programs and will take required general studies courses before enrolling in their chosen program.

The **Transfer** option is for students who want to transfer their credits to a four-year institution to complete a bachelor's degree in a health sciences or pre-professional health program.

The SCC Experience

- » Associate of Health Sciences students benefit from intentional advising. The College Advisors are well equipped and connected to four-year school representatives and the SCC Associate of Health Sciences program, and is trained to specifically advise transfer students on requirements. Advisors are committed to student success and are available to answer questions for students.
- » Associate of Health Sciences students are preparing to be healthcare professionals. In addition to general education requirements, students have the option to complete elective coursework including Emergency Medical Technician, Medication Aide, Electrocardiograph (EKG) Technician, Nursing Assistant, Sterile Processing, and more to equip them with employable skills and training in the healthcare field, helping students gain valuable experience while they work toward their career goals.
- » Students complete general education requirements at a reasonable cost while researching and preparing for study in a healthcare field. Small class sizes and engaged learning practices help students develop and practice important communication and teamwork skills needed for their future careers.
- » SCC's Associate of Health Sciences instructors are among the best! Our faculty are highly qualified, and students receive individual attention from qualified.
