

Personality + Career

You will be successful in a Heating, Ventilation, Air Conditioning & Refrigeration Technology career if you like to work with your hands, are a problem solver, and communicate effectively with a diverse customer base. HVAC/R technicians enjoy great pay and are in high demand.

Program	Credential	What do students learn in the program?	What do students earn?	Career Opportunities	Are graduates prepared for/to complete exams for specific credentials/licensing/certifications at the end of the program (each credential level)?	Required Tools, Supplies, and Uniforms
Heating, Ventilation, Air Conditioning & Refrigeration Technology	Diploma	Students learn to install, diagnose, service, and repair heating, air conditioning, and refrigeration equipment. Students also learn basic electrical principles and sheet metal fabrication for the HVAC/R industry.	(salary listed is an average for all credentials)	HVAC Technician Maintenance Technician Service Technician	EPA Certification	Tool list provided. No uniform required.
Heating, Ventilation, Air Conditioning & Refrigeration Technology	Associate of Applied Science	In addition to the skills noted above, students learn to install and service commercial refrigeration and HVAC systems and hot water heating systems. Students also learn to utilize the ACCA Manual J and Manual D procedures to meet mechanical code requirements.	\$22.25 hourly \$46,280 annually	HVAC Technician Maintenance Technician Service Technician	EPA Certification	Tool list provided. No uniform required.

Heating, Ventilation, Air Conditioning & Refrigeration Technology

In the Heating, Ventilation, Air Conditioning & Refrigeration Technology program you'll learn heating and cooling checks, work on projects in refrigeration, sheet metal and brazing and learn how to install an HVAC system in our student-built house. Students receive hands-on training in a variety of lab settings using the same equipment and test instruments used in the field. Our program graduate employment rate is high, with 100% of 2020 graduates finding work in the industry.

To gain valuable experience working with a company, students will take a 240-hour paid Cooperative Experience from May to July. Prior to graduation, students will be required to take the Industry Competency Exam. The ICE measures industry-agreed standards of basic competencies for entry-level technicians.

The SCC Experience

- » The SCC program is hands-on! Students spend 50% of their time in the lab. Associate of Applied Science students complete a paid cooperative education experience in their fourth (and final) semester. Many cooperative experiences lead to full-time job offers.
- » Students in the Heating, Ventilation, Air Conditioning, and Refrigeration Technology program work on the student built-house each fall. Students install the mechanical systems and work alongside students from several other SCC programs. This hands-on experience of working on a new construction project is unmatched!
- » Program faculty arrange field trips to a variety of industry leaders and assist students with their cooperative experience placement. This ensures that students gain hands-on training in the field.
