

Change Multifactor Authentication

You can change your MFA options here – <https://aka.ms/mfasetup>

If you are prompted to sign in, use the same credentials you use to log in to The Hub.

To add a new MFA option Click the “Add sign-in method” link:

The screenshot shows the 'Security info' page. At the top, it says 'Security info' and 'These are the methods you use to sign into your account or reset your password.' Below this, it lists the 'Default sign-in method' as 'Phone - text +1 [redacted]' with a 'Change' link. A red box highlights the '+ Add sign-in method' link. Below this are three rows of MFA methods:

Method	Device/Number	Action 1	Action 2
Phone	+1. [redacted]	Change	Delete
Microsoft Authenticator Push multi-factor authentication (MFA)	Pixel 4a		Delete
Email	[redacted]@gmail.com	Change	Delete

This will pop up a new message window, click the drop down and select the type of method you need:

The image shows a screenshot of a web-based dialog box titled "Add a method" with a close button (X) in the top right corner. Below the title is the question "Which method would you like to add?". A dropdown menu is open, showing the text "Choose a method" with a downward arrow. The menu lists four options: "Authenticator app", "Alternate phone", "Security key", and "Office phone".

As you go through the rest of the menus you will be prompted to verify the phone, app or key to confirm.
